A dedicated and hardworking professional in the field of architecture, currently pursuing a Master's degree to deepen my expertise and knowledge. Known for my strong work ethic, excellent interpersonal skills, and eagerness to learn, I am committed to delivering high-quality work and collaborating effectively with diverse teams. With a solid foundation in architectural design and project management, I am seeking opportunities to apply my academic learning and hands-on experience to contribute to innovative and sustainable architectural solutions.

Work Experiences

PT Desain Visi - Jakarta, Indonesia

Oct 2021 - Dec 2021

Architectural Intern

Architectural Firm

- Studied and analyzed various building materials and gained insights into building concepts specifically for residential housing.
- Conducted detailed analysis and developed an initial building concept for a mixed-use mall project in the Jakarta area, ensuring optimal space utilization and compliance with local regulations.
- Performed site analysis and proposed basic conceptual designs for a Type C hospital in Subang, West Java, focusing on functionality, patient flow, and regulatory requirements.
- Designed and created a building concept proposal for a corporate office building in the Jakarta area, incorporating modern architectural trends and ensuring efficiency in workspace design.
- Compiled and scheduled working drawings for residential building projects, ensuring all drawings met project deadlines and specifications for construction teams.

PT Global Citra Prima/Marunda Center - Bekasi, Indonesia

Feb 2023 - Present

Architect & drafter

Integrated Port, Industrial and Logistics Center Developer

- Designed and created detailed drawings for the cafeteria area within the development, ensuring functionality, safety, and aesthetic alignment with the overall site plan.
- Contributed as a design team member in the creation of detailed drawings for a new MR DIY warehouse, collaborating with structural engineers and project managers to ensure efficient space planning and compliance with safety standards.
- Worked as part of the design team to create detailed architectural drawings for the warehouse and workshop facilities at Halliburton Indonesia, optimizing layout for operational efficiency.
- Developed and designed architectural concepts for the head office building at Marunda Center, incorporating modern design principles and client requirements to create a functional and aesthetic workspace.
- Produced 3D renderings and visualizations for the bridge design within the development area, providing visual context for stakeholders and clients to understand the project scope and design intent.
- Designed landscape features for the dome building in the area, creating green spaces that complemented the architectural design and improved the building's environmental impact.
- Led design development, detailed drawing creation, and site supervision for the construction of a police post, ensuring the project met safety standards and adhered to the local building regulations.
- Contributed to the design team for the construction of a floodgate, ensuring efficient water management solutions while maintaining structural integrity and compliance with environmental regulations.
- Supervised and created design drawings for an electrical substation building, coordinating with engineers to ensure safety and functionality while minimizing energy consumption and operational costs.
- Designed and developed detailed drawings for a new roadway within the area, optimizing traffic flow and ensuring safety and accessibility for both pedestrians and vehicles.
- Collaborated as part of the design team for the development of the entire site, contributing to the overall concept design and development, ensuring all elements were integrated effectively and met client expectations.

Architectural Freelance - Bekasi, Indonesia

Feb 2023 - Present

- Designed, created detailed drawings, and produced 3D renderings for a residential project in Bekasi, overseeing the project from concept through to completion to ensure quality and adherence to design standards.
- Provided architectural design concepts for the interior of a studio apartment in Bekasi, focusing on maximizing space efficiency and aesthetic appeal while adhering to client requirements and budget constraints.
- Developed design proposals and detailed drawings for a residential building project in Bekasi, ensuring all technical specifications, safety standards, and local building codes were met.
- Created design proposals and supervised renovations for a residential project in Bekasi, managing project timelines and ensuring that the renovation work adhered to the original design intent and client specifications.
